■ Match the positions listed on the right with the descriptions on the left.

- | | | |
|--|--------------------------|-----------|
| 11. Normally capable of repairing automotive brake systems. | (A) Master technician | 11. _____ |
| 12. In charge of all the other technicians in the service facility. | (B) Shop service manager | 12. _____ |
| 13. Handles customer complaints. | (C) Automotive engineer | 13. _____ |
| 14. Prepares shop work orders on cars entering the garage for repairs. | (D) Shop supervisor | 14. _____ |
| 15. Designs new automotive systems and parts. | (E) Service writer | 15. _____ |

Preparing for a Career in Automotive Technology

16. Why must automobile technicians have above-average math and English skills? _____

17. What are *cooperative training programs*? _____

18. What are some of the responsibilities of a technician who accepts employment at an automotive repair facility?

ASE Certification

19. What is the function of the ASE board of directors? _____

20. What is *automobile technician certification*? _____

21. List the eight automotive technology test categories of the ASE certification test. _____

22. How many tests can be taken at each ASE certification testing session? 22. _____

- (A) Two
- (B) Four
- (C) Five
- (D) None of the above.

23. ASE-certified master automobile technician status is granted when _____ 23. _____

areas have been passed.

- (A) at least two
- (B) four out of eight
- (C) six out of eight
- (D) all eight

24. What are the requirements for ASE certification? _____

25. When are ASE certification tests given? _____

26. List three tips that might help you pass the ASE test.

- (A) _____

- (B) _____

- (C) _____

27. The ASE tests are designed to measure your knowledge of what three things? _____

28. What types of questions are used in ASE certification tests? _____

29. Identify the following type of ASE question. Answer the question and explain why you chose your particular answer. 29. _____

The fuel in a gasoline injection system is sprayed into the combustion chamber by these parts:

- (A) injectors.
- (B) valves.
- (C) spark plugs.
- (D) glow plugs.

30. Once you are certified in any area, you must take a recertification test every _____ years to maintain your certification. 30. _____

Entrepreneurship

31. Define *entrepreneur*. _____

32. Most successful entrepreneurs have a quality known as _____. 32. _____
